# OSRAM Portfolio

## PRODUCT CATALOG

With the recent acquisition of OSRAM Digital Systems business in Europe and Asia, Inventronics is now a new global leader in the lighting industry.

This merger of two industry powerhouses brings together our collective expertise and enables us to offer a very broad range of products, system solutions and services.

We offer LED-based lighting components for various application areas, such as indoor, outdoor, office, hospitality, retail, industry, residential and horticulture lighting.

# LED Light Engines and Modules

The advent of LEDs in the lighting industry has created unlimited freedom in light source design, thus enabling luminaires that have been unthinkable before. With our comprehensive portfolio of LED light engines and modules, our market expertise and uncompromised quality, we make our customers more successful in their businesses.

# Round

Our round LED light engines and LED modules are suitable for a wide variety of applications that range from decorative spotlighting in the retail sector and downlighting or wall lighting in hotels, restaurants and offices to functional lighting in corridors or other peripheral areas of public and commercial buildings.

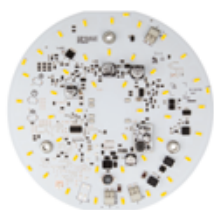

**PrevaLED Core**  
LED modules ideal for spot- and downlights

**PrevaLED Cube AC**  
Mains-voltage-driven light engines with integrated light control gear for compact luminaire designs

**PrevaLED COIN**  
LED modules with integrated optics and heat sink for easy installation and/or quick replacement

**PrevaLED Flat AC**  
All-in-one solution for flat and highly diffuse wall-mounted or ceiling-mounted luminaires

**LED Spot Modules**  
Dimmable LED spot modules with connection cable, integrated optics and a narrow beam angle

**Accessories**  
Various mounting rings, covers and optical lenses for our round LED modules and light engines

## Linear and Area

Our linear and area LED modules are available in many different lengths, sizes, luminous fluxes and color temperatures. This extremely wide range of products ensures great luminaire design flexibility for excellent general lighting – for example in offices or retail, but also in the healthcare, education or industrial sectors.

### Linear LED Modules

Perfect e. g. for recessed, surface-mounted, pendant or batten luminaires as well as trunking systems

### Area and Bar LED Modules

For quick and easy integration, e.g. in rectangular or linear office, corridor or industrial luminaires

### Accessories

Get everything from mounting brackets to end caps, from linear diffusers to clear optical lenses

## Outdoor

With an average service life of up to 100,000 hours, our high-performance PrevaLED BRICK family of LED modules combines compact design with efficiency and durability. Their high light output makes them ideally suitable for a broad range of outdoor applications, including street, urban, area, industrial, highbay and floodlighting for sports and industrial facilities.

### **PrevaLED BRICK HP**

LED modules for outdoor and street lighting, available in six different color temperatures (2200 - 6500 K)

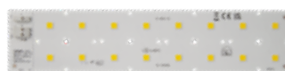

### **PrevaLED BRICK HP IP**

Compatible to optics with IP solution, available in four different color temperatures (2200 - 4000 K)

### **PrevaLED BRICK HP Z2**

High-performance LED modules for outdoor, area, industry and street lighting with up to 176 lm/W

### **PrevaLED BRICK HP HE**

These high power/high efficiency LED modules offer a decisive plus in terms of higher energy efficiency

### **PrevaLED BRICK MP**

For powerful highbay and area lighting with 64 LEDs per module and a luminous flux of up to 5470 lm

## Horticulture

In horticulture applications, LED luminaires must be especially powerful, efficient and robust to meet the demanding requirements of this highly competitive industry, such as healthy plant growth and high yields. Our Planta Seed BRICK and Planta Seed LINEAR LED modules are optimally designed to meet these challenges.

### **Planta Seed BRICK**

These modules come with an efficacy of up to 3.6  $\mu\text{mol}/\text{J}$  and enable customized horticulture solutions

### **Planta Seed LINEAR**

Special-purpose linear LED modules for fresh food counters lighting as well as greenhouse applications

# Flexible LED Strips for Individualized Applications

Optimally designed to meet the demands of sophisticated lighting projects, our flexible LED strip solutions enable highly individualized applications, e. g. for the hospitality and retail industries. They bring homogeneous light into narrowest coves and perfectly illuminate every space with a large selection of light colors.

<b>Premium LED Modules</b>	<b>17</b>
<b>Functional LED Modules</b>	<b>19</b>
<b>Basic LED Modules</b>	<b>21</b>

## Special solutions

For more information about special solutions with flexible constant voltage LED modules, please see the following chapters:

<b>Dotless Solutions</b>	<b>25</b>
<b>Grazing Solutions</b>	<b>31</b>
<b>Backlighting and Advertising</b>	<b>35</b>

## Premium LED Modules

Our LINEARlight FLEX family of premium LED strips for high-end applications comes with a wide range of useful features and benefits. They are the best choice for representative and prestigious applications, enabling the design of professional and durable LED lighting systems, from monochrome white light to Colormix and Tunable White solutions.

### White

#### **LINEARlight FLEX IP00**

Broad range of LED strips for indoor use, incl. Low Power, High Power, Uniformity and Infinite versions

#### **LINEARlight FLEX Protect**

LED strips protected by high-performance silicone for long service life (IP68)

### Colormix

#### **LINEARlight FLEX Colormix IP00**

LED strips with multichip RGB LEDs and easy mounting on smooth surfaces via adhesive tape

#### **LINEARlight FLEX Colormix Protect**

Colormix LED strips protected by high-performance silicone for long service life (IP68)

### Tunable White

#### **LINEARlight FLEX Tunable White IP00**

LED strips with white light color temperature adjustable from 2200 up to 6500 K (CRI 80)

#### **LINEARlight FLEX Tunable White Protect**

Tunable White LED strips protected by high-performance silicone for long service life (IP68)

# Functional LED Modules

Enabling monochrome white light, Colormix applications as well as Tunable White lighting solutions, our TEC Flex family of functional LED strips for professional use comes with a clever selection of helpful features and benefits.

## White

### TEC Flex IP00

Shortpitch, low power and high power LED strips with a luminous flux of up to 2000 lm/m

## Colormix

### TEC Flex Colormix IP00

LED strips for indoor use with uniform color changing, pre-wired for quick installation

## Tunable White

### TEC Flex Tunable White IP00

LED strips with white light color temperature adjustable from 2700 to 6500 K

### TEC Flex Protect

Shortpitch, low power and high power LED strips with IP66

### TEC Flex Tunable White Protect

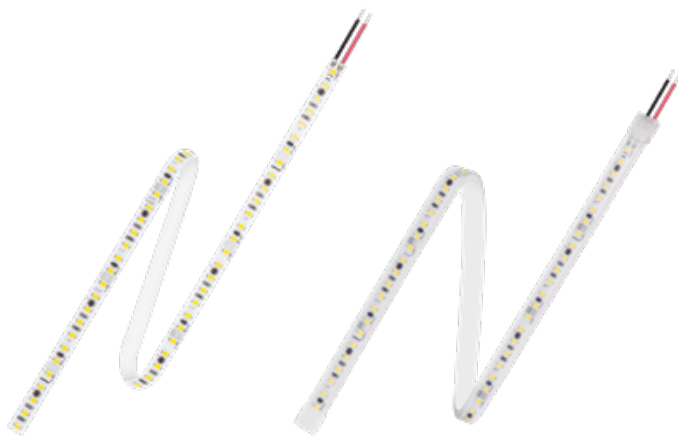

LED strips for Tunable White applications with IP66

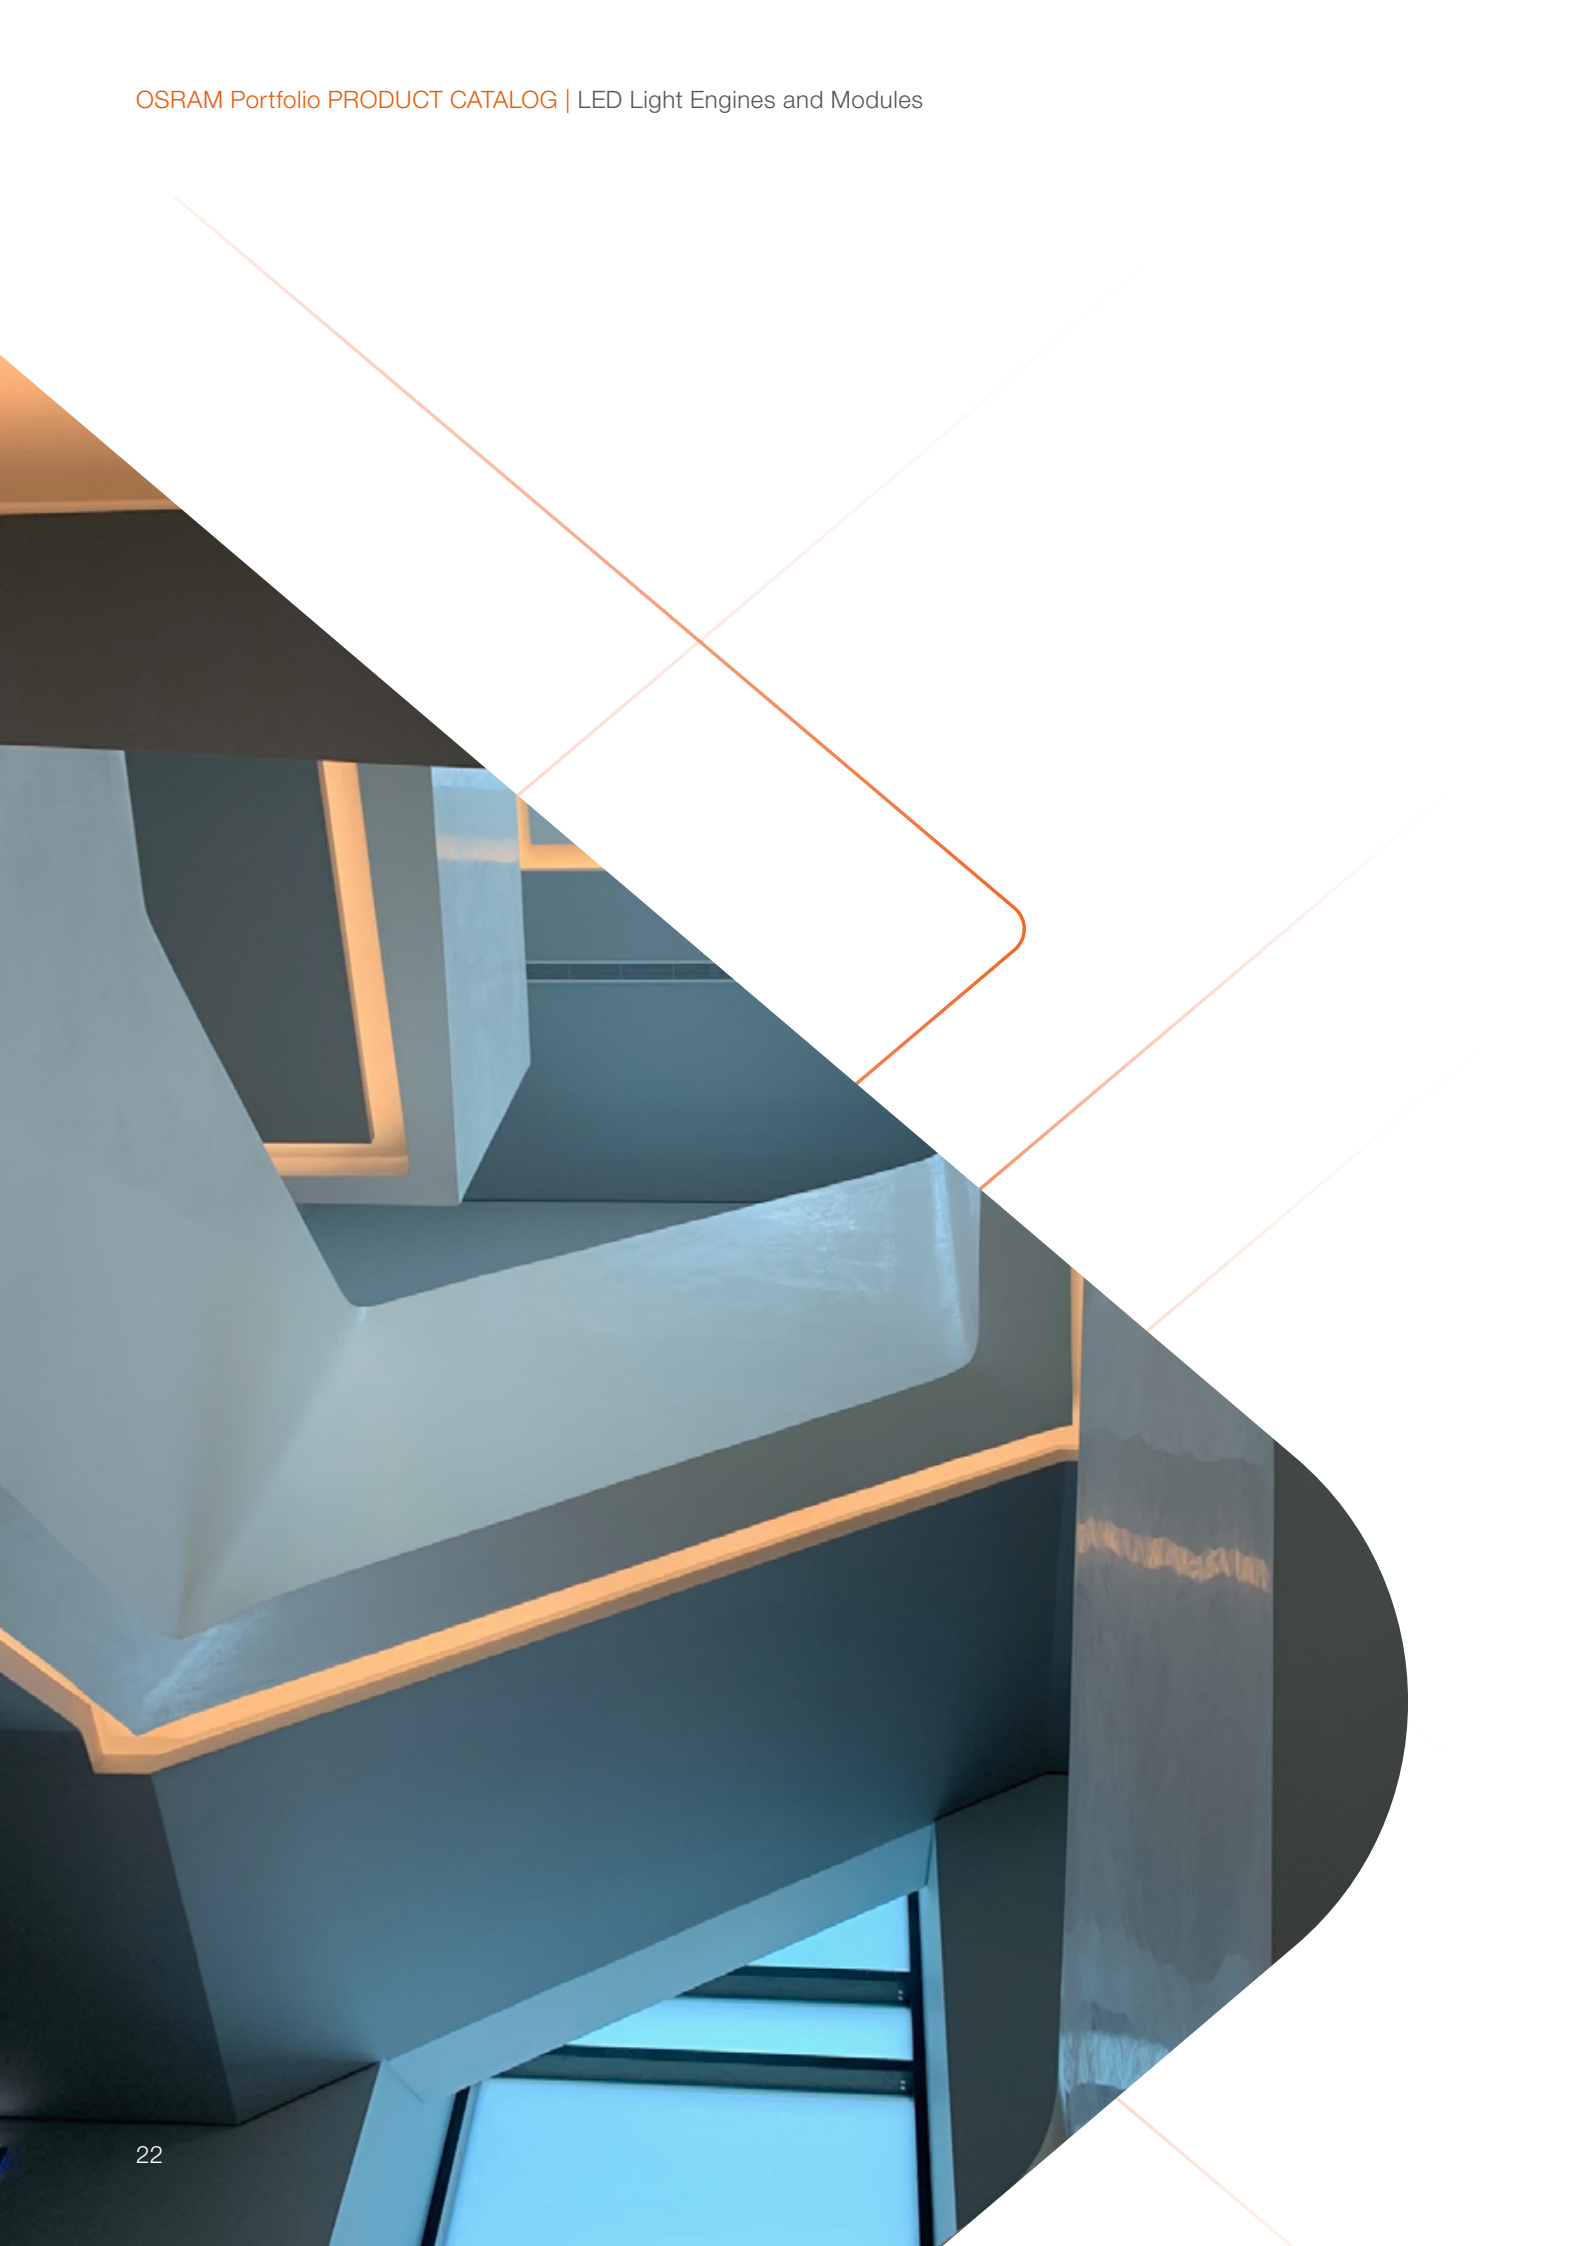

## Basic LED Modules

Not every application necessarily has to be a high-end solution. That's why entry-level LED strips are also part of our extensive product portfolio. They combine flexibility and efficiency with a set of useful basic features, giving you high quality for simple lighting solutions.

### **BASIC Flex**

Two versions: Shortpitch IP00 and Protect Shortpitch, both available in warm white or neutral white

Profiles

Connection Systems

# Profiles and Connection Systems

Our plug-and-play LED strips can be supplemented with helpful accessories for different applications, for example with connectors, different profiles and light-directing covers.

## Profiles

### Surface-Mounted Profiles

A wide selection of profiles for professional surface, corner and round corner installation of LED strips

### Recessed Profiles

Our recessed profiles for LED strips come in three sizes and enable elegant flush-mounted solutions

## Connection Systems

### White 2pin Flexible LED Strips Connector

### White 2pin LINEARlight FLEX IP67 Connector

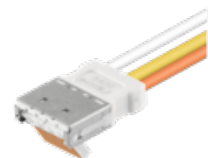

### TEC Flex Protect IP66 Connector

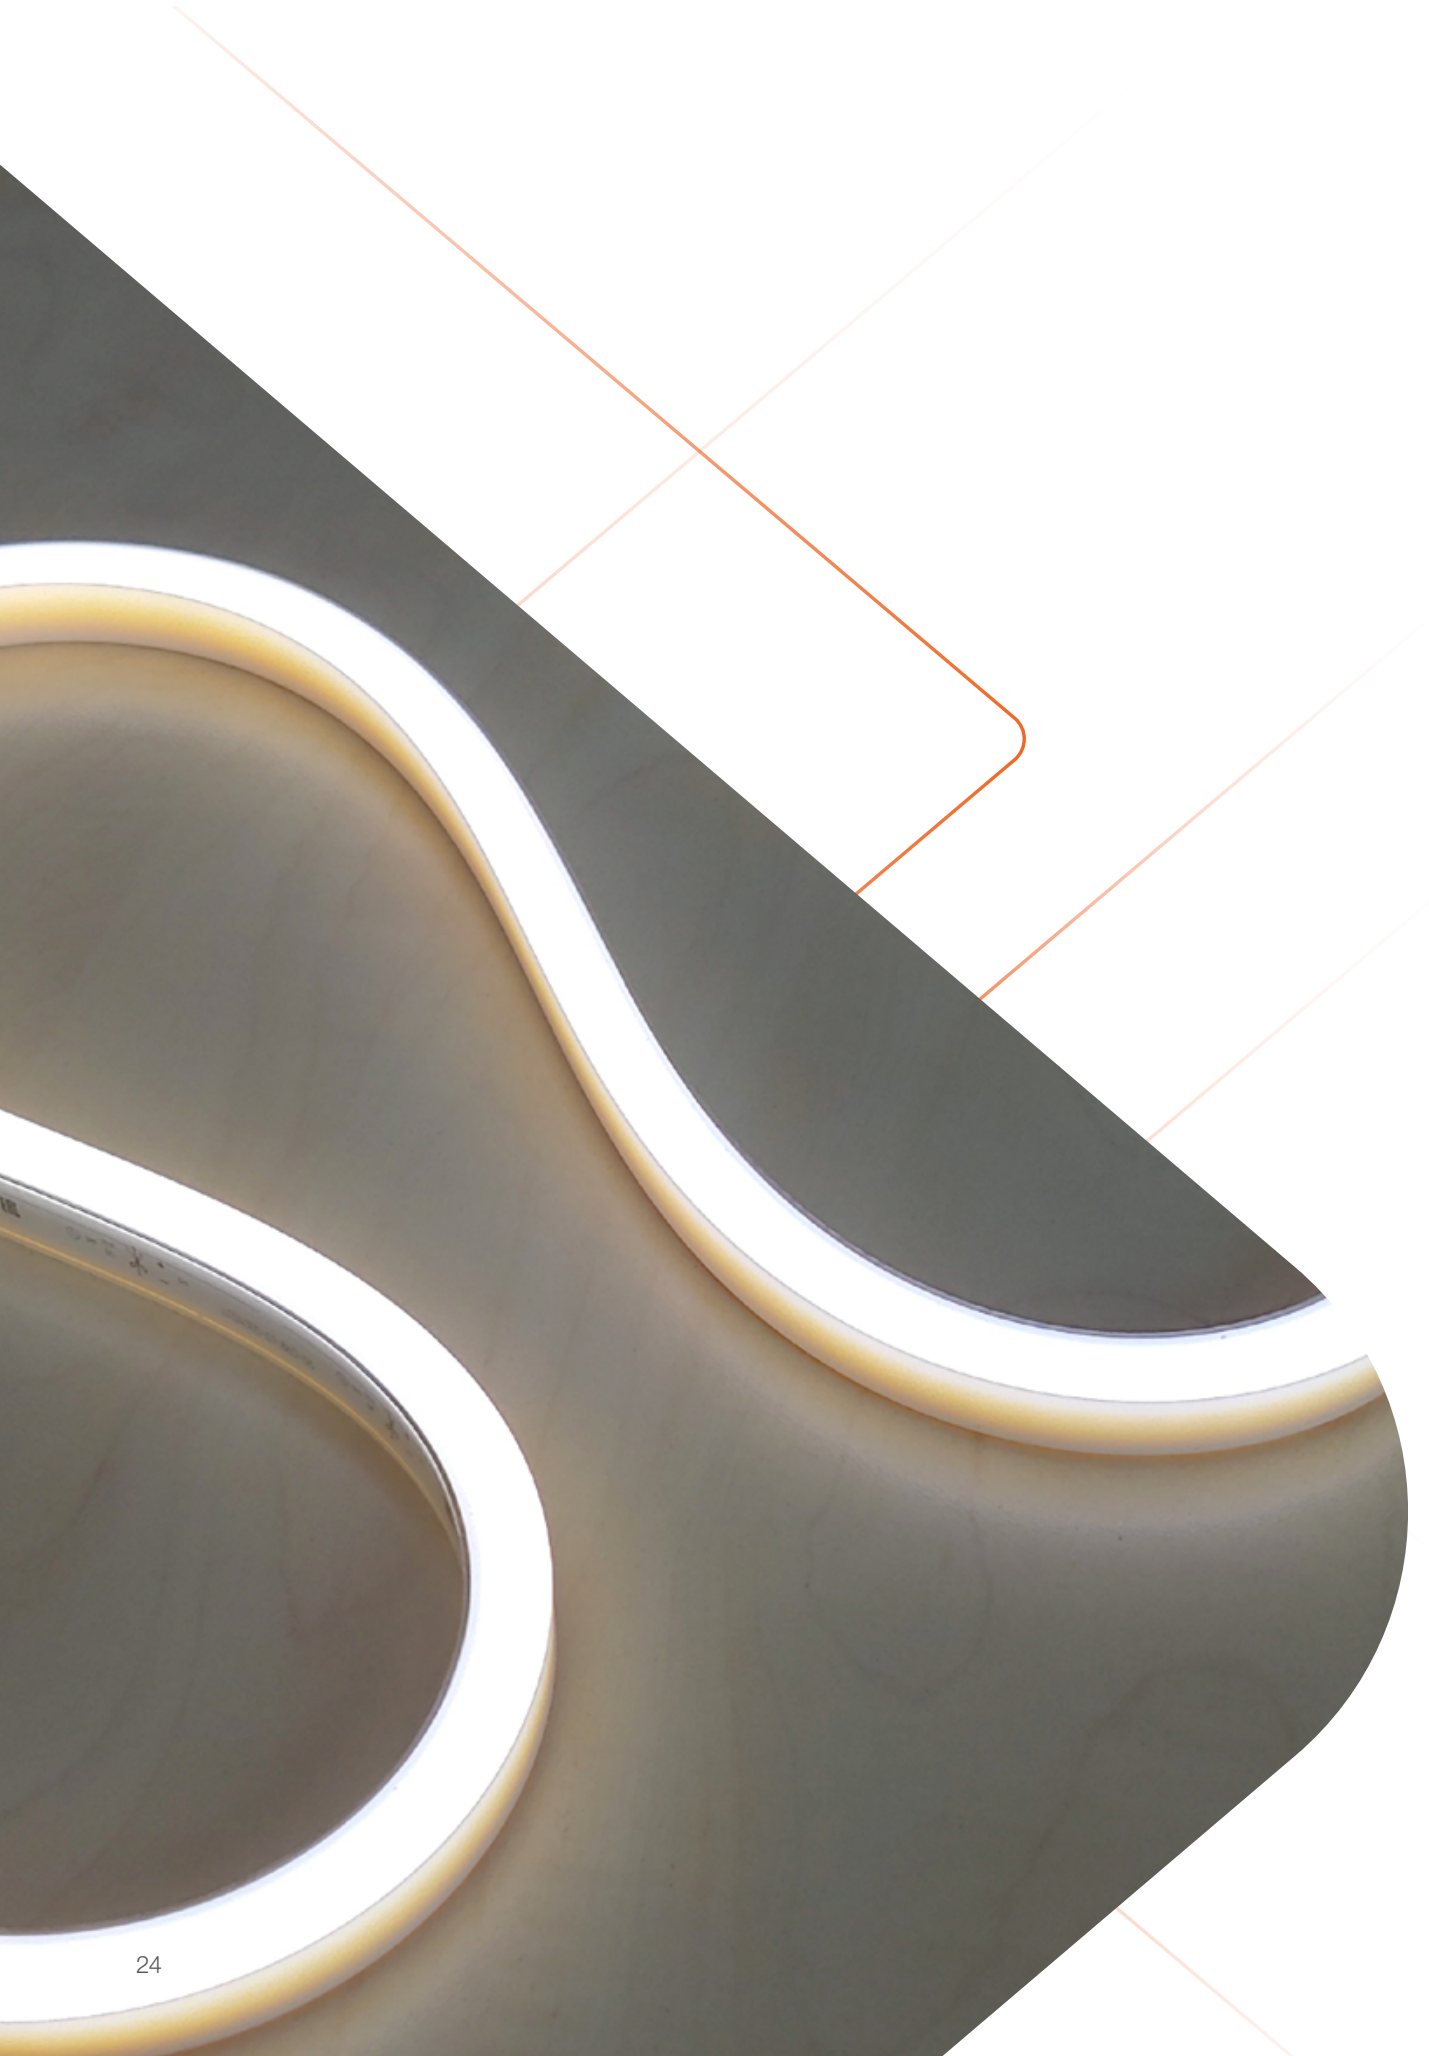

### RGB 4pin LINEARlight FLEX IP67 Connector

### RGB 4pin Flexible LED Strips Connector

### Tunable White 3pin Flexible LED Strips Connector

## Dotless Solutions

Today's cutting-edge LED technologies not only offer an unprecedented range of possible applications, but also provide very high light quality. Our dotless solutions enable sophisticated, shadow-free lighting designs with elegant accents that create pleasant atmospheres, e. g. in the hospitality and retail sectors.

<b>Premium LED Modules</b>	27
<b>Functional LED Modules</b>	29

## Premium LED Modules

Our LINEARlight FLEX Diffuse LED strips are perfect for decorative lighting in high-end applications. Bending either to the side or to the top, these flexible modules offer very homogeneous light distribution. They can be easily adapted to curved architectural shapes, thus creating particularly harmonious lighting effects.

### **LINEARlight FLEX Diffuse Top**

Dimmable and cuttable, made from high-performance silicone (IP68), which also enables outdoor use

### **LINEARlight FLEX Diffuse Side**

Dimmable and cuttable, made from high-performance silicone (IP68), which also enables outdoor use

### **LINEARlight FLEX Diffuse Profile System**

Depending on the type of installation, these aluminum profiles are available in bendable or rigid versions

### **LINEARlight FLEX Diffuse IP67 Connector**

This IP67-protected power feeder can be connected to the front of the module or at division points

# Functional LED Modules

Enabling monochrome white light, Colormix applications as well as Tunable White lighting solutions, our GINOLED FLEX Diffuse family of functional LED strips for professional use comes with a clever selection of helpful features and benefits.

## White

### **GINOLED FLEX Diffuse Top**

This super-slim LED strip comes with IP67 protection for outdoor application

### **GINOLED FLEX Diffuse Side**

This super-slim LED strip comes with IP67 protection for outdoor application

## Colormix

### **GINOLED FLEX Diffuse Colormix Top**

RGB colormix LED strips with IP67 protection for outdoor application and a length of up to 8 m

## Tunable White

### **GINOLED FLEX Diffuse Tunable White Top**

TW LED strips with IP67 protection, available in different lengths of up to 5 m

### **GINOLED FLEX Diffuse Tunable White Side**

TW LED strips with IP67 protection, available in different lengths of up to 5 m

## Grazing Solutions

Decorative lighting plays an increasingly important role in architectural design. With our LED-based wallwashing and wallgrazing solutions, you can create lighting effects that accentuate architectural details, highlighting contours and shapes in an aesthetically appealing way – both indoors and outdoors.

**Premium Rigid LED Modules** 33

**Premium Flexible LED Modules** 33

Rigid LED Modules

Flexible LED Modules

## Premium LED Modules

LINEARlight Rigid FINESSE is our premium line of LED modules for powerful and stylish architectural lighting. This innovative system is the ideal solution for fascinating presentations of classic and modern buildings as well as historic landmarks.

### Rigid LED Modules

#### LINEARlight Rigid FINESSE

These lighting systems can be mounted on a surface or disappear into recessed ceilings or light coves

#### LINEARlight Rigid FINESSE InGround

These IP67/IK09-protected lighting systems can be built into indoor floors as well as outdoor pavements

#### LINEARlight Rigid FINESSE – Accessories

Large range of accessories, incl. wall arms, metal clips, pendant installation kits, power cables, terminals etc.

### Flexible LED Modules

#### LINEARlight Flex BACKBONE 3D

Bendable sideways as well as upwards and downwards: 3D-flexibility for maximum creative freedom

# Backlighting and Light Advertising

Our LED solutions for backlighting and light advertising combine outstanding performance and efficiency with high recognition values. The signage designs that are possible with our BackLED and BoxLED modules provide excellent customer guidance and help companies attract attention to their products and services.

<b>BackLED</b>	37
<b>BoxLED</b>	39

# BackLED

Designed for direct backlighting of flat and slim installations, our versatile BackLED family of LED modules is ideally suitable for a wide range of applications – from channel letters to backlighting of single and double-sided light boxes and from city light posters to billboards, illuminated indoor walls and ceilings.

## BackLED

Flexibly configurable backlighting modules with different wattages, color temperatures and lenses

## BackLED TW

With patented Square Lens technology and IP66 rating, color temperature adjustable from 2700 to 6500 K

## BackLED RGBW Plus

With dimmable, robustly encapsulated LED modules (IP66) for dynamic color-changing light effects

## BackLED Area

Cuttable LED boards for area luminaires, available in three white light color temperatures or TW version

## BoxLED

Developed for side injection into single-sided or double-sided light boxes, our BoxLED family of LED chains provides uniform light distribution thanks to elliptical optics. Depending on the size of the light boxes and the required amount of light, the modules can be placed on one, two, three or all four sides of the box.

### BoxLED M CP

Chain of 32 linear LED modules, connected with flexible cables (max. length: 9.8 m)

### BoxLED L CP

Chain of ten linear LED modules, connected with flexible cables (max. length: 4.5 m)

### BoxLED XS Plus

Extremely slim chain of 32 linear LED modules with three LEDs per module, IP66/68

### BoxLED M Plus

Chain of 32 linear LED modules with optimized lenses for uniform illumination

## Accessories for Backlighting

Our high-quality LED backlighting technologies come with a well-thought-out selection of perfectly matched accessories. Whether you want to build light boxes, channel letters, city light posters, billboards, illuminated walls or ceilings, our portfolio always provides you with the right solutions.

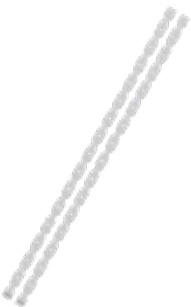

**BackLED CP –  
Mounting Profile**

**BackLED CP –  
Wire Clip**

**BoxLED CP –  
Mounting Profile**

**BackLED Area –  
Holding Bar**

**BoxLED CP –  
Wire Clip**

# LED Drivers

With a wide range of LED drivers, we provide you with individual LED solutions for your multifaceted lighting projects. Our LED drivers are known for their high performance and efficiency, offering you enormous flexibility for the design of LED luminaires. Whether it's for indoor or outdoor settings, round, compact or linear luminaires, general or accent lighting.

## Driver Selector & Digital OT-Poster

With our Driver Selector & Digital OT-Poster, you can easily find your desired LED driver and create your individual driver overview by selecting the product families, operating data, functions and applications. Or simply filter by attributes for your needs – always with the latest product portfolio.

# Constant Current Linear – Indoor

Designed for high-performance lighting systems, these LED drivers are especially suitable for professional indoor solutions. Their linear shape makes them ideal for integration into linear LED luminaires, e.g. in offices, public buildings, industrial or educational institutions.

## **Constant Current Linear + Area – Dimmable**

Discover a wide selection of dimmable OPTOTRONIC wired and wireless as well as ICUTRONIC drivers

## **Constant Current Linear + Area – Non dimmable**

Our OPTOTRONIC FIT, ICUTRONIC FIT and ELEMENT FIT driver families for a wide range of applications

# Constant Current Compact – Indoor

Thanks to their compact form factor, these constant current LED drivers are ideally suited for unobtrusive integration into compact and elegant luminaires or lighting track systems, all of which are becoming increasingly popular in the hospitality and high-end retail industries, for example.

## Constant Current Compact – Dimmable

Here you will find our portfolio of dimmable, compact OTi and IT, wired or wireless, and OT Phase-cut drivers

## Constant Current Compact – Non dimmable

On/off LED drivers for compact lighting solutions, incl. OT FIT, IT FIT and ELEMENT product families

## Constant Current – Outdoor

With long average lifetimes of up to 100,000 hours, these robust constant current LED drivers are ideally suited for demanding application conditions, e.g. in industrial, urban and street lighting. In addition to their robust design, some of these drivers have a DEXAL interface or up to four different dimming modes.

### Constant Current Outdoor – Dimmable

This range of LED drivers includes OT DEXAL, OT 1DIM/2DIM/4DIM as well as ICUTRONIC DALI models

### Constant Current Outdoor – Non dimmable

Straightforward on/off LED drivers for industrial or urban/street lighting.

## Constant Voltage – Indoor

Constant voltage LED drivers are particularly suitable for lighting systems that are operated with safety extra-low voltage, such as LED strips for accent lighting or LED chains for backlighting. These devices are easy to install and ideal for use, e.g. in hospitality, retail, residential, signage or architectural lighting.

### Constant Voltage – Dimmable

Our dimmable 24V power supplies are suitable for a wide range of indoor (and some outdoor) applications

### Constant Voltage – Non dimmable

Our non dimmable 12 or 24V power supplies include OPTOTRONIC, ICUTRONIC FIT and ELEMENT models

### Constant Voltage – Dimmers

Choose the dimming method from our one- or multi-channel dimmers with Bluetooth, DALI, DMX or 1...10V

## Constant Voltage – Outdoor

Our constant voltage LED drivers are designed for combination with corresponding constant voltage LED modules for outdoor areas. They are particularly easy and safe to install. Characterized by their robust design, these drivers are especially suitable for applications with demanding environmental conditions.

### Constant Voltage – Dimmable

These devices come with an ingress protection rating of IP66/IP67 and are dimmable via DALI or 1...10V

### Constant Voltage – Non dimmable

Choose from a selection of non dimmable 12 or 24V power supplies, from the OPTOTRONIC and OT FIT models

# Programming Tools and Accessories

One of the many advantages of modern LED lighting solutions is that they can be precisely programmed to match a broad range of application requirements, thus fulfilling specific customer and/or end user demands. With our programming tools and other well-designed accessories, we help you to develop successful lighting solutions that will reliably serve their purposes for many years to come.

**Programming Tools and Accessories – Indoor**  
PC interfaces (indoor)

**Programming Tools and Accessories – Outdoor**  
PC interfaces (outdoor)

**OPTOTRONIC Cable Clamp**  
Easy to install with captive, pre-fixed screws, ideal for independent mounting

**OPTOTRONIC Track Accessories**  
Accessories for track-mounted LED drivers, for quick and easy installation (color matches driver housing)

**EBN-OS**  
This inrush current limiter increases the maximum number of operating devices per circuit breaker enormously

**Surge Protection Devices**  
Our SPD /275/ D, SPD G2 and SPD P5 G2 effectively protect your lighting system from overvoltage pulses

# Light Management Systems

Our light management systems are available in a wide variety of designs – from small sensors and simple dimmers to high-performance central controllers that allow our customers to easily manage the lighting of complete floors or even entire buildings. But regardless of their size, they all have one thing in common: They help their users to save energy, CO<sub>2</sub> and costs in a very convenient, flexible and efficient way.

## Stand-alone Sensors

Using our stand-alone sensors in combination with our control systems can achieve energy savings of up to 50 %. With HIGH BAY and VISION, the lighting system is only switched on if the sensors detect motion in the room. OSENZA Office additionally detects presence. It also measures the incoming daylight and, if necessary, supplements it with artificial light.

### **HIGH BAY**

Motion sensor with switching contact, detects people and vehicle movements, e.g. in production halls

### **VISION**

Motion sensor for large areas (open-plan offices, corridors, storage rooms), standby consumption 0.25 W

### **OSENZA Office**

Very slim light and motion sensor (for single offices, corridors, storage rooms), presence detection via PIR

## PCU/MCU

Installed in a flush-mounted box and connected to the AC power supply, these simple dimming devices can control up to 25 luminaires with the integrated DALI supply. The DALI PCU TW G2 allows controlling DALI control gears via standard pushbuttons. The digital rotary dimmer DALI MCU has tactile detents so that brightness can be fine-tuned in individual steps.

### **DALI PCU TW G2**

For manual dimming, switching and TW operation, combinable with presence and motion detectors

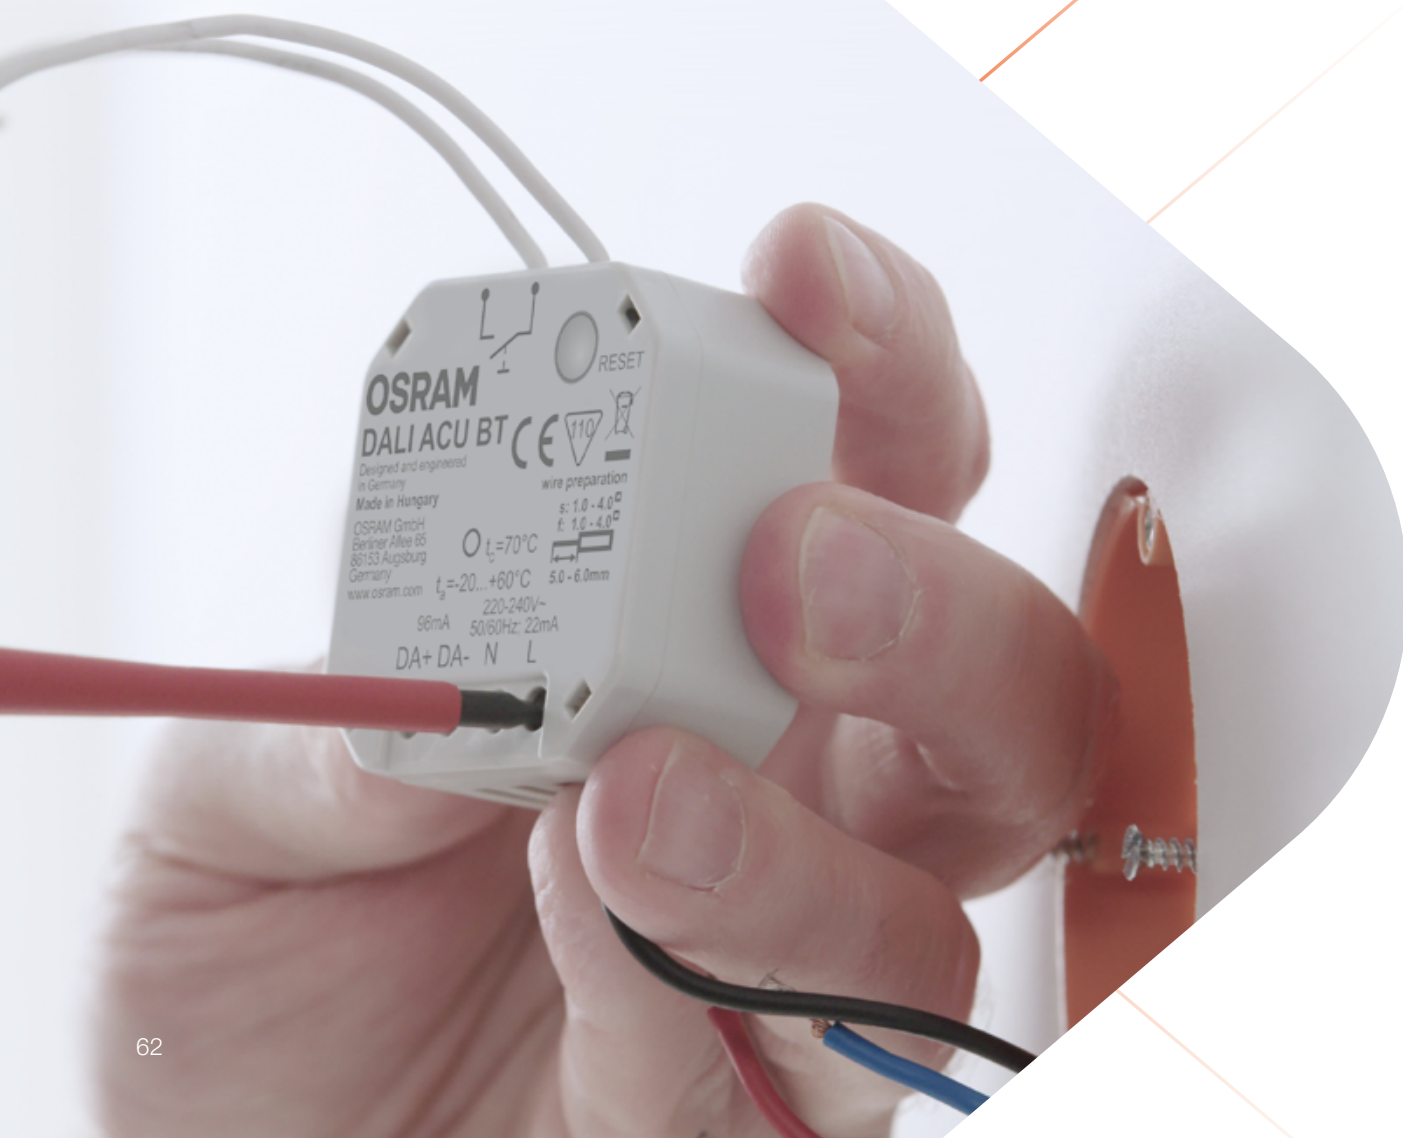

### **DALI MCU TW G2**

Rotary dimmer for manual dimming, switching and TW operation, easy human-centric lighting solution

### **DIM MCU G2**

Rotary dimmer for manual dimming and switching, e.g. for office, hospitality or retail applications

## DALI ACU BT

With its Bluetooth interface, the DALI ACU BT controller is ideally suited for the lighting control of small and medium-sized DALI installations via smartphone. The control unit supports standard white and Tunable White light luminaires according to DALI device type 8 (DT8), e. g. for offices, conference rooms and training rooms as well as for retail lighting.

### Controller

DALI ACU BT enables intuitive dimming, switching and TW operation via pushbutton or smartphone

### Sensors

A broad range of light sensors, presence detectors and other devices for energy saving

### DALI Coupler

DALI-2-certified pushbutton coupler for flush-type installation, e.g. in offices, conference rooms etc.

DALI ECO

DALI ECO BT

DALI ECO BT RTC

## DALI ECO, DALI ECO BT and DALI ECO BT RTC

This family of cost-efficient light management systems offers a wide range of operation possibilities for intelligent energy-saving solutions. DALI ECO allows simple switching and dimming as well as daylight-dependent control and presence detection via sensors. With DALI ECO BT, standard or Tunable White LED drivers can be controlled via smartphone/Bluetooth, enabling lighting scenes with different color temperatures, luminaire grouping and more. And thanks to the integrated real-time clock, DALI ECO BT RTC offers state-of-the-art human-centric lighting (HCL) applications.

### DALI ECO

#### Controller

DALI ECO for daylight-/presence-dependent control, DALI ECO Swarm Adapter for wireless synchronization

### DALI ECO BT

#### Controller

DALI ECO BT allows lighting control via sensors and pushbuttons, as well as via Bluetooth smartphones

### DALI ECO BT RTC

#### Controller

DALI ECO BT RTC with integrated real-time clock, suitable for human-centric lighting (HCL) applications

#### System Components

Additional system components such as sensors, couplers and user interfaces can be found with the respective product

# HubSense

With user-friendly software packages, the innovative and extremely flexible HubSense system can be adapted to lighting installations of any size – in new as well as in existing buildings. Quickly installed and easily commissioned, this scalable wireless control system enables end users to interact with their lighting system via the individually customizable HubSense end user app or wireless pushbuttons.

## User Interfaces

EASYFIT Bluetooth switch, e.g. for offices, stairways etc., HubSense PB coupler for pushbutton control

## Sensors with Controller

High-quality sensor technology based on the proven Qualified Bluetooth Mesh communication protocol

## Converters

QBM DALI CONV LI and QBM DALI EL-T work with HubSense, suitable for up to 32 DALI-2 LED drivers

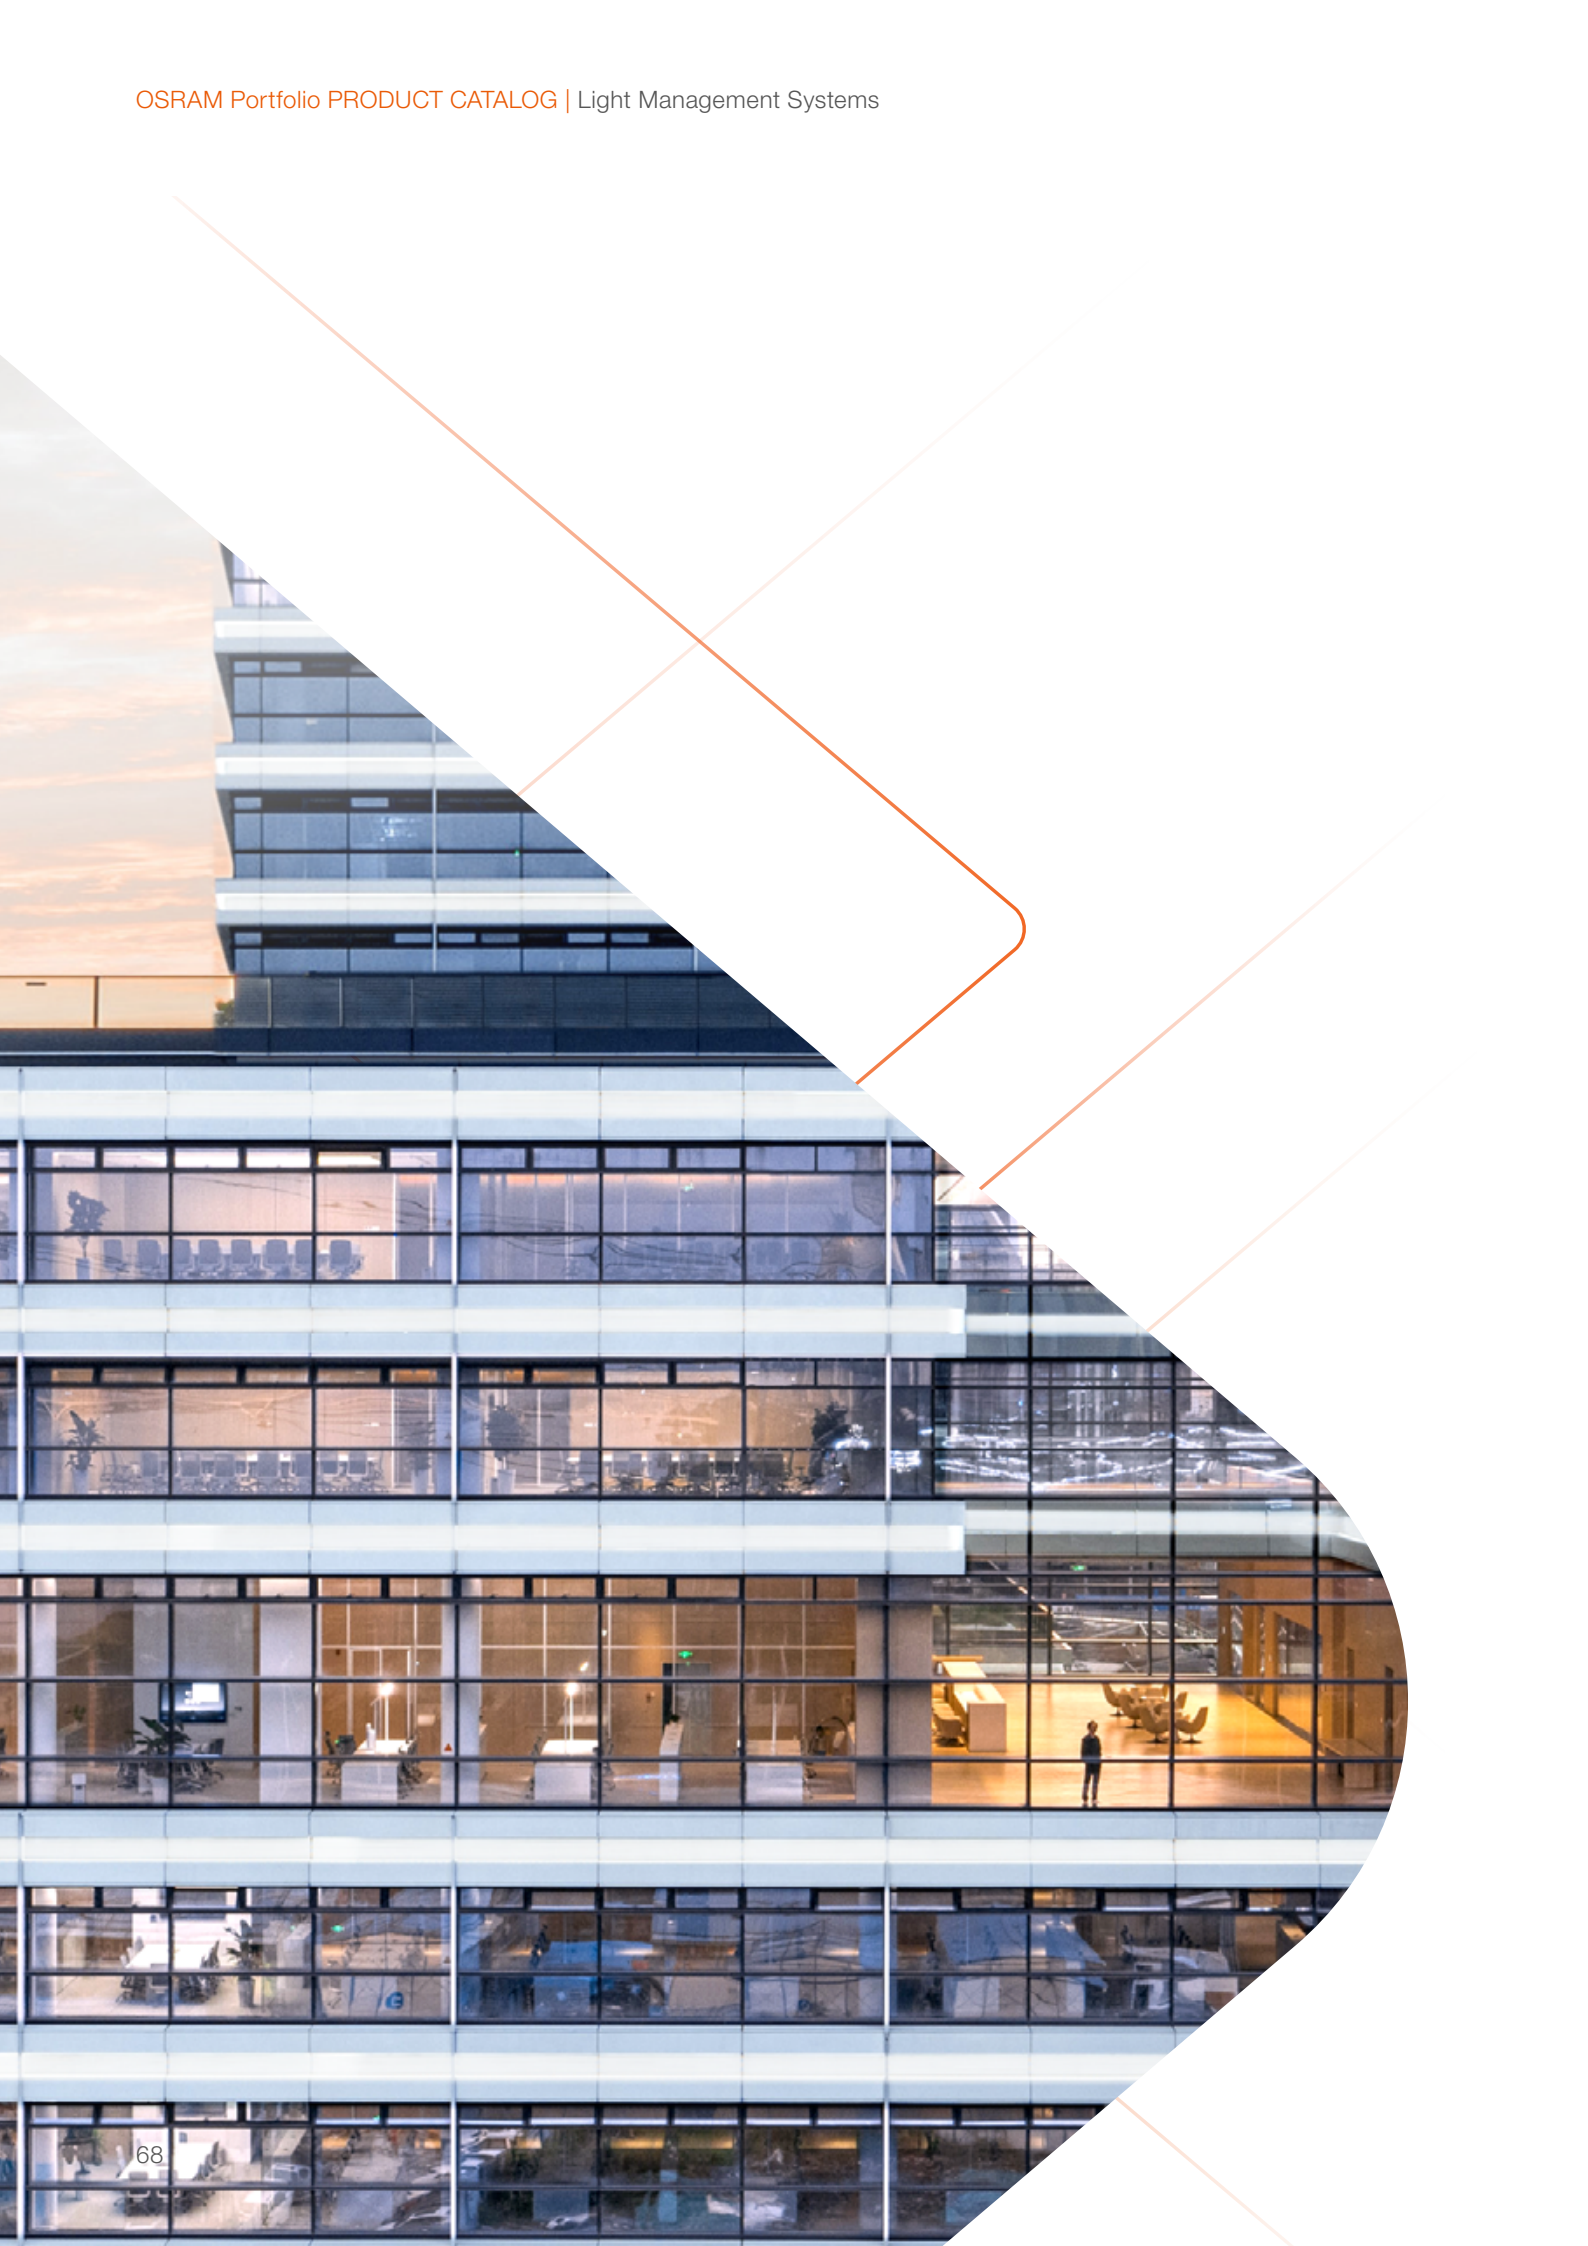

## Compact LED Drivers

OTi QBM NFC S and OTi QBM NFC I work with HubSense, offering high-quality 1...100 % dimming and more

More  
information

# DALI PROFESSIONAL

Our flexible DALI PROFESSIONAL controller is ideal for areas with up to 256 light points. By interconnecting up to four controllers, areas with up to 1024 light points can be controlled. It supports DALI drivers, Tunable White, RGB, RGBW and more. DALI PROFESSIONAL is optimized for energy saving with OSRAM-brand sensors. In addition, an integrated app configurator enables individual control by multiple users.

## Controllers

DALI PRO CONT-4 RTC – a powerful light management system with a wide range of features and benefits

## Sensors

A broad range of light sensors, presence detectors and other devices for energy saving with DALI PROFESSIONAL

## User Interfaces

DALI PROFESSIONAL pushbutton coupler, designed specifically for professional lighting installations

## Actuators

The DALI Switch SO is a flexible, non-system-specific signal converter for use with all DALI control units

## Converters and Repeaters

DALI REP LI and DALI REP SO let you expand your DALI lighting control system by up to 64 ECGs

More  
information

## DALI PRO 2 IoT

DALI PRO 2 IoT is the innovative LMS control technology for the IoT age. DALI-2 certified and featuring a controller for two DALI lines as well as a built-in gateway, it meets all of today's requirements for professional and efficient light management. Thanks to its browser-based graphical user interface, commissioning the system is as fast and easy as never before.

### Controllers

DALI PRO 2 IoT: DALI-2-certified, IoT-ready controller with a built-in gateway for remote data access

### Sensors

A broad range of light sensors, presence detectors and other devices for energy saving with DALI PRO 2 IoT

### User Interfaces

DALI-2-certified pushbutton coupler for flush-type installation, e.g. in offices, conference rooms etc.

### Actuators

The DALI Switch SO is a flexible, non-system-specific signal converter for use with all DALI control units

### Converters and Repeaters

DALI REP LI and DALI REP SO let you expand your DALI lighting control system by up to 64 ECGs

More  
information

## DALI-2 Components

The DALI-2 protocol is the result of a number of revisions of the DALI standard. Adding new features and introducing standardization of control devices while maintaining backwards compatibility, DALI-2 offers significant improvements in interoperability. The following components comply with the DALI-2 protocol.

### Sensors

A broad range of DALI-2-certified light sensors, presence detectors and other devices for energy saving

### User Interfaces

DALI-2-certified pushbutton coupler for flush-type installation, e.g. in offices, conference rooms etc.

## Touch DIM

The Touch DIM function makes it possible to switch and dim the control gear directly with line voltage via standard pushbuttons. Additionally, it can be combined with a sensor to enable daylight harvesting and presence detection. The main features can be directly adapted in the driver via the Tuner4TRONIC software.

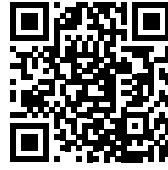

### Sensors

LS/PD LT2 LI UF with LEDset interface and Touch DIM LS/PD LI light/presence sensors, ideal for single luminaires
